PA & CO - logo for debossing

Minimum stroke width raised to 1 mm. Proportions, spacing and letterforms unchanged.

As supplied

thinnest stroke 0.25 mm heaviest 2.02 mm contrast 8:1

Bold version - USE THIS

thinnest stroke 1.03 mm heaviest 2.83 mm contrast 2.7:1

At 50 mm wide, printed or debossed

Thinnest stroke	1.03 mm (was 0.25 mm)
Heaviest stroke	2.83 mm
Narrowest gap inside a letter	1.38 mm
Separate shapes	6 - unchanged
Enclosed counters	12 - unchanged, none closed

Notes

Nothing was moved, rescaled or redrawn. Every outline was offset outward by 0.40 mm with mitred corners, so the serifs stay square and the diamond keeps its points. This is a bold cut of the same logo, not a different one.

The O is joined to the bar beneath it, so the two deboss as a single piece.

1.5 mm strokes are not possible at 50 mm: the gaps inside the letters would fall to 0.74 mm and the counters would start to close. For 1.5 mm strokes use the 75 mm file, where every stroke is at least 1.55 mm and the tightest gap is 2.07 mm.
