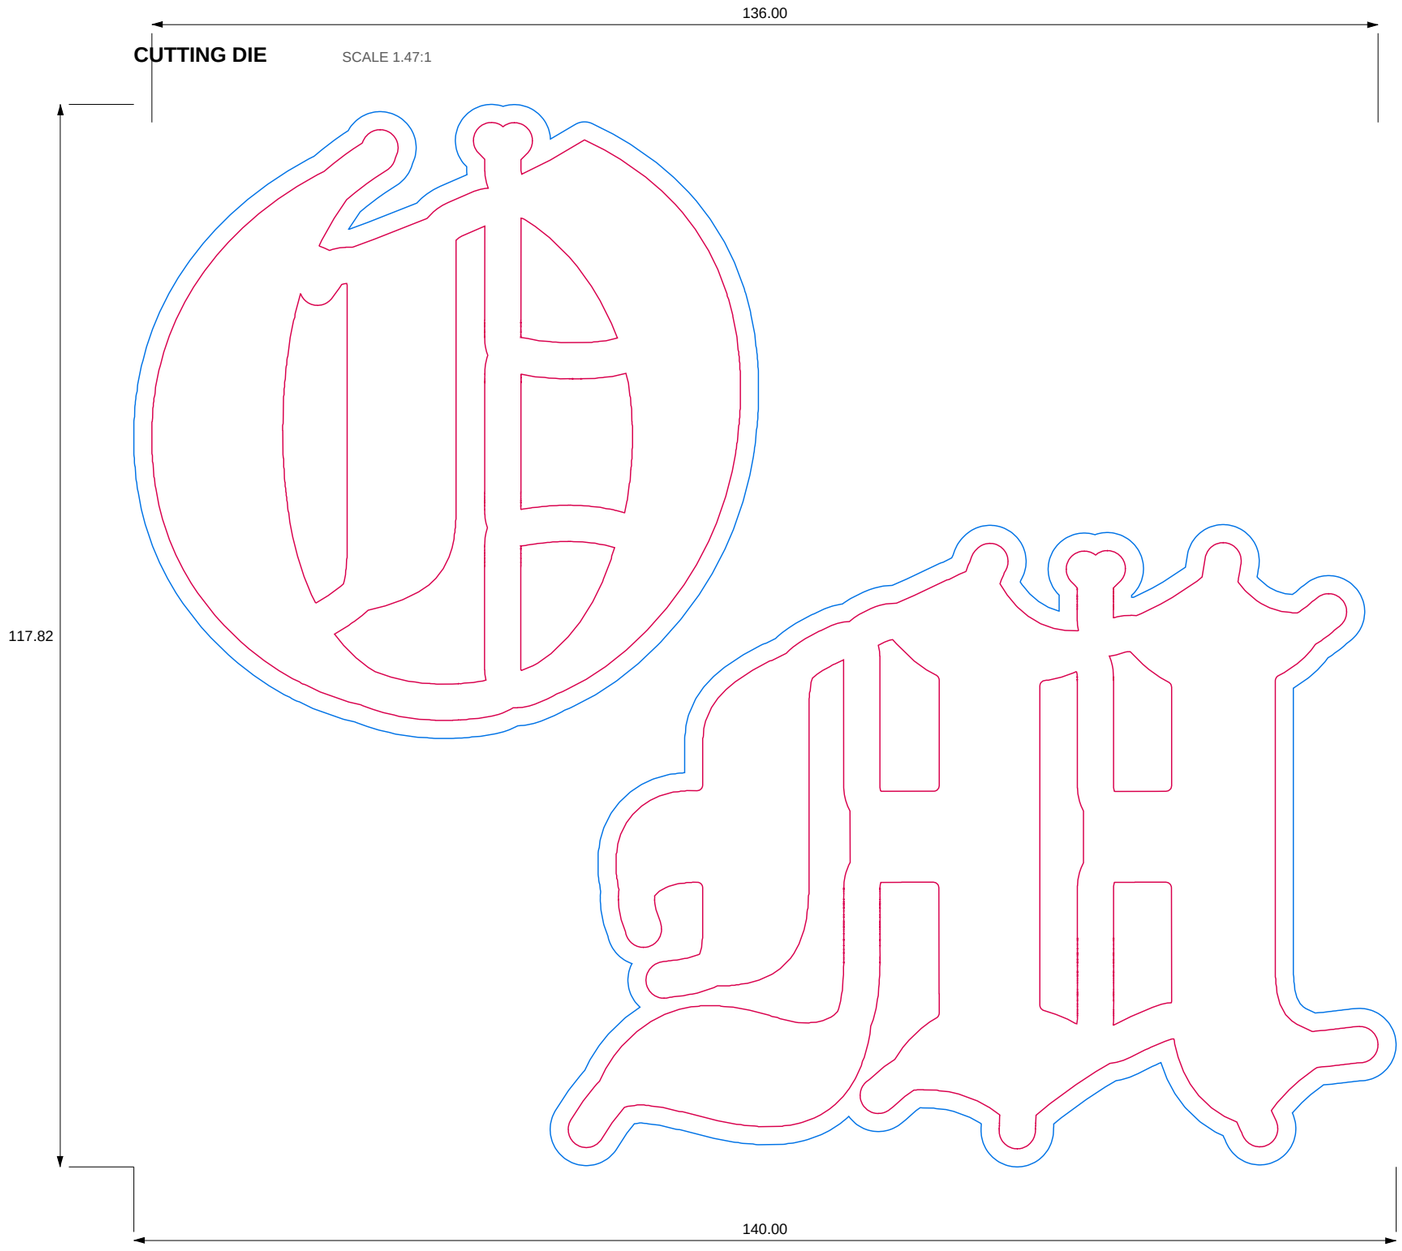
CUTTING DIE

SCALE 1.47:1



LAYERS

———	**TOP**	the mark itself, two pieces
———	**UNDER**	backing, +2.0 mm all round, one per letter

MEASURED

Top, overall	136.00 x 113.82 mm
Backing, overall	140.00 x 117.82 mm
Border all round	2.00 mm
Smallest feature	4.00 mm, everywhere
Gap, O to M	10.89 mm
Backing to backing	6.89 mm
Pieces	top 2, backing 2

NOTES

1. All dimensions in millimetres. Cut lines are the finished edge.
2. TOP cuts as two pieces, the O and the M. They are 10.89 mm apart and must not be joined.
3. UNDER is 2 pieces, one per letter, 6.89 mm apart. They must not be joined either.
4. Nothing on TOP is thinner than 4.00 mm ANYWHERE - a disc that wide reaches every part of it, which is the test, not an average. Nothing may be scaled down without checking it again.
5. Notches under 1.20 mm have been filled so a rule can be bent to them. That figure is deliberately well under the minimum above: tying the two together fills the counters as well.
6. Counters too small to cut have been dropped. Those that remain are cut through.
