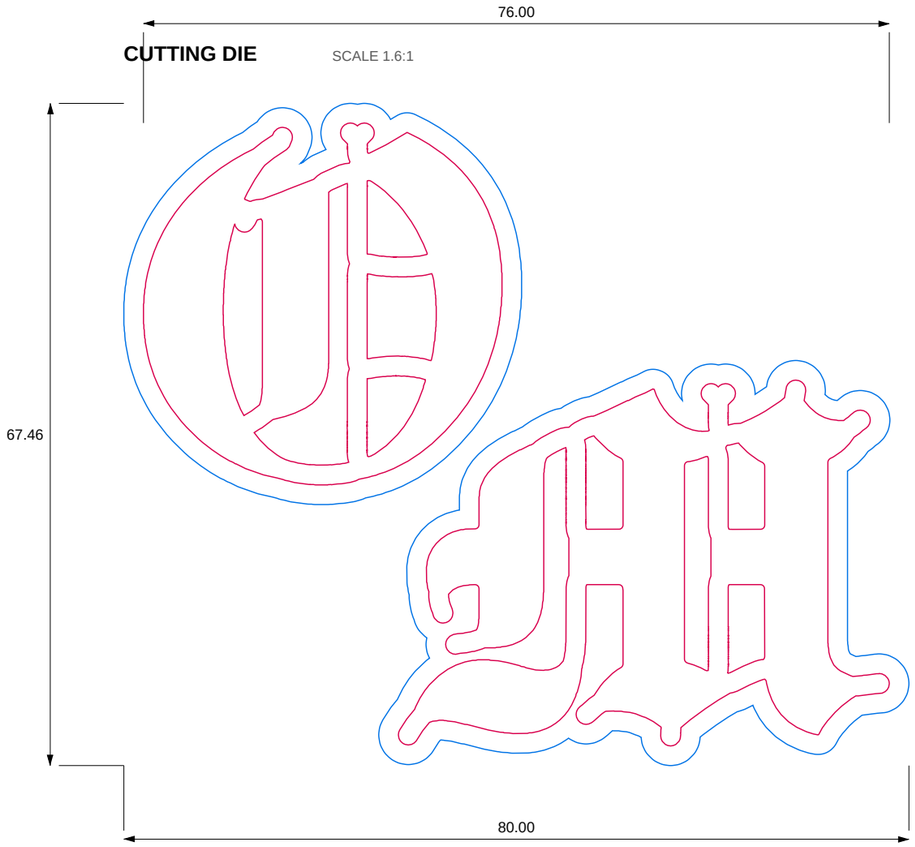
CUTTING DIE

SCALE 1.6:1



LAYERS

———	**TOP**	the mark itself, two pieces
———	**UNDER**	backing, +2.0 mm all round, one per letter

MEASURED

Top, overall	76.00 x 63.46 mm
Backing, overall	80.00 x 67.46 mm
Border all round	2.00 mm
Smallest feature	2.00 mm, everywhere
Gap, O to M	6.09 mm
Backing to backing	2.09 mm
Pieces	top 2, backing 2

NOTES

1 All dimensions in millimetres. Cut lines are the finished edge.

2 TOP cuts as two pieces, the O and the M. They are 6.09 mm apart and must not be joined.

3 UNDER is 2 pieces, one per letter, 2.09 mm apart. They must not be joined either.

4 Nothing on TOP is thinner than 2.00 mm ANYWHERE - a disc that wide reaches every part of it, which is the test, not an average. Nothing may be scaled down without checking it again.

5 Notches under 0.80 mm have been filled so a rule can be bent to them. That figure is deliberately well under the minimum above: tying the two together fills the counters as well.

6 Counters too small to cut have been dropped. Those that remain are cut through.
